

# Our World

A national competition for S1-S6 learners

Explore language learning through **filmmaking and sustainability** with engaging interdisciplinary activities.

Our World 2026, run by SCILT, is a national interdisciplinary competition combining language learning, sustainability and filmmaking for secondary schools.

Learners work in teams to explore the UN Sustainable Development Goals, create a storyboard and then turn their idea into a short film using at least one language other than English.

This engaging project develops creativity, teamwork and employability skills, broadens horizons for language learners, and culminates in a live online film premiere and awards celebration. 🎬
