

[StampIT](#) is the Association of Scottish Philatelic Societies youth programme where children can discover a world of stamps through interactive games and activities.

StampIT also provides a number of ideas for teachers to use stamps across the curriculum. Stamps are a great medium for learning about a wide range of subjects.

StampIT's activities are free to all and can be used within the classroom or home learning, making it ideal for any blended learning environment.

[StampIT's website](#) has a brand new look and launching soon is 'Stamp over October'. This series develops various skills and increases knowledge across the curriculum for the **broad general education** phase. The range of activities cover **experiences and outcomes** in many areas within **expressive arts; language and literacy; mathematics; sciences; social studies** and **technologies**. The activities will also last beyond October!

'Stamp over October' includes daily activity plans (less formal than lesson plans but still include **key learning aims**). Some involve competitions and challenges, some involve sharing the child's work, some involve a limited number of free give-aways. All develop important key skills.

StampIT has language games and [language competitions](#) for [Spanish](#), [French](#), [Mandarin](#) & [Japanese](#). (Sound files are available in the Mandarin & Japanese online versions.) StampIT is always evolving so please continue to check the website for new games.

There are also many art activities within the '[Stampy things](#)' and [Fun with stamps](#) sections.
